

Model 419EG Drop Tube Extender for Gauging Applications

SPECIFICATION SHEET

Application

The **419EG** drop tube extender sleeve connects two sections of the same diameter drop tube end-to-end. Use the **419EGT** installation tool to connect the sleeve to the drop tube. The 419EG drop tube extenders are designed for use in gauging applications and are only compatible with Morrison 2" drop tubes.

Features and Details

- Available in 2" size
- Allows for combining up to 50 feet of drop tube
- Can be utilized with Morrison's 818 and 918 series gauges
- 419EGT is a reusable tool required for installation of the 419EG
